for Glycemic Control

diabetes

GREEN ZONE

YOUR BLOOD SUGAR IS UNDER CONTROL

- Your blood sugar range will change throughout the day.
 - Before meals: 70-130 mg/dL
 - After meals: <180 mg/dL
 (Corresponds to your recommended A1C goal ____%)
- Continue taking your medications as prescribed*
- Continue checking your blood sugar regularly*
- Follow healthy eating habits*
- Keep all doctor appointments*

*General advice for all zones

YELLOW ZONE

YOUR DOCTOR MAY LIKELY NEED TO ADJUST YOUR MEDICATIONS

- Average blood sugar is between 150 and 210 mg/dL most of the time (Corresponds to A1C between 7% and 9%)
- Improve your eating habits
- Improve your activity level

Work closely with your health care team if you are going into the YELLOW Zone. Call your health care provider or certified diabetes educator if following the recommended changes in your activity level and/or eating habits doesn't decrease your blood sugar levels.

RED ZONE

YOU NEED TO BE CHECKED BY A DOCTOR

- Average blood sugar is over 210 mg/dL most of the time (Corresponds to A1C >9%)
- Most fasting blood sugars are well above 200 mg/dL

Call your health care provider if you are in the RED Zone or if your blood sugar is above

_____ mg/dL.
